

Job Title: Post-doctoral Position in Haptics

Date Posted: October 1, 2008

Application Deadline: Open Until Filled

Job Description

The Center for Cognitive Ubiquitous Computing (CUbiC) at Arizona State University invites applications for a full-time postdoctoral research fellow position in the area of haptics. A Ph.D. degree in Computer Science or Computer Engineering or closely related areas is required.

CUbiC works on fundamental research in multimedia addressing applications in assistive technologies, rehabilitative systems and diagnostic tools. In its next phase of research, CUbiC intends to expand its research in the field of cross-modal studies between vision and haptics, and its applications in haptics interfaces, with specific focus of delivering information haptically to end-users.

Successful candidates will have strong publication records, including national and international conferences and journals, in projects related to haptic interfaces, visio-haptics and/or fundamental research in cross-modal studies of vision and haptics. Excellent skills in verbal and written English are required, as well as demonstrated ability to work collaboratively in a research team.

Candidates will be expected to lead projects in areas of haptics mentioned above, publish scholarly work in top peer reviewed conferences and journals, and assist in proposal writing.

To apply for this position, please send applications, including a complete CV, a brief research statement, links to two representative published manuscripts, and the names and contact information of 3 references to:
